

```
#include <stdio.h>

int main() {

    int num;

    printf("Enter an integer: ");

    scanf("%d", &num);

    if(num % 2 == 0)

        printf("%d is even.", num);

    else

        printf("%d is odd.", num);

    return 0;

}
```

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\HP\Documents\oddeven.exe". The window content shows the following text: "Enter an integer: 15", "15 is odd.", a separator line of dashes, "Process exited after 12.14 seconds with return value 0", and "Press any key to continue . . .".

```
C:\Users\HP\Documents\oddeven.exe
Enter an integer: 15
15 is odd.
-----
Process exited after 12.14 seconds with return value 0
Press any key to continue . . .
```
